

Faris Planning & Design is a small land planning and landscape architecture firm located in Hilliard, OH, that is dedicated to creating exceptional, yet functional, design. We specialize in a broad range of services, which allows us to assist our clients in every step of the development process, from early site evaluation and concept design, working through the rezoning and development plan process, to construction. Our project scope ranges from small commercial and residential landscapes to large industrial planning, with the projects located across Ohio. We are looking for an early career to mid-level landscape designer who wants to work in a collaborative office environment, in a highly creative and fast-paced field.

Role Description

Our firm works on a broad range of scales and scopes of landscape architecture and planning projects, and because of this, the role will be wide-ranging with many opportunities to work on different types of projects. The initial role will be to work with our current staff in meeting deadlines, with the intention that they will be able to work on projects independently as they progress in their time here. Some of the responsibilities include:

- Assist staff with production of site plans, planting plans, and other various design exhibits
- Assist in the production of exhibits for rezoning and development plan applications
- Attend hearings and client meetings
- Create illustrative drawings by free-hand drawing, 2D digital rendering, or 3D digital rendering
- Aid staff with production of construction documents
- Perform site visits and conduct tree surveys

Qualifications

- Education: bachelor's or master's degree in landscape architecture from an accredited university
- Experience: 3-5 years in the landscape architecture field.
- Specific experience designing to municipal and city zoning code standards and/or rezoning and development plan approval process desired
- Technical Skills: proficient in AutoCAD, Adobe Creative Suite, and Microsoft Office Suite (proficiency in SketchUp and Lumion is a plus)
- Excellent communication skills including verbal, written, and graphic
- Ability to collaborate with other design teams in engineering and architecture
- Excellent time management skills to meet deadlines and work on multiple projects simultaneously
- Knowledge of local plant material is a plus

Please include your resume and portfolio, in either PDF format or a link to download if your portfolio exceeds 10 MB. We look forward to hearing from you!
